PROFESSIONAL SUMMARY

Full-Stack Software Engineer experienced in designing and building production web and mobile platforms, enterprise operational systems, and multi-sided marketplaces. Strong end-to-end ownership across system architecture, backend APIs, frontend and mobile applications, relational and NoSQL data modeling, payments, real-time systems, cloud infrastructure, and production deployment. Built products across on-demand delivery, manufacturing, e-commerce, mobility, and marketplace platforms using TypeScript, React, React Native, Next.js, NestJS, PostgreSQL, MongoDB, AWS, Stripe, and Socket.io.

PROFESSIONAL EXPERIENCE

Tudelü / Duralux Architectural Canopies Aug 2024 - Present

Full-Stack Software Engineer / Technical Lead | Little Ferry, NJ

- Joined as the initial sole engineer and designed the architecture for a unified CRM and operations platform spanning frontend, backend APIs, database, AWS S3 workflows, deployment, and technical delivery.
- Consolidated CRM, sales, quoting, e-commerce, inventory, production, and internal workflows previously handled across HubSpot, Trello, and separate tools, reducing software costs by approximately \$9,000 per month.
- Built the quote-to-order system with dimension-based pricing, 3D product rendering, quote requests, digital signing, Stripe payments, real-time inventory updates, and carrier shipping-rate quotes.
- Implemented sales pipeline, distributor management, regional representative routing, automated emails, RBAC for four user roles, and AWS S3 document management.
- Developed a Manufacturing Execution System for materials scanning, cutting instructions, panel assembly, and shipping handoff, with validations that block incorrect or excess material usage.
- Expanded from sole engineer to technical leadership by recruiting and guiding developers supporting platform growth and feature delivery.

Development Real Time Strategy (DRTS) Nov 2021 - Present

Founder & Lead Full-Stack Engineer | Lodi, NJ

- Founded a product development agency focused on SaaS, marketplace, mobile, e-commerce, and internal operations platforms from product design through production delivery.
- Led end-to-end engineering across TypeScript, React, Next.js, NestJS, PostgreSQL, MongoDB, Stripe, AWS S3, Firebase, and real-time features.
- Improved application performance by 15% through server-side caching and NestJS architecture improvements.
- Recruited, onboarded, and led a cross-functional team of six engineers and designers across client and internal products.

\$9K/month

Software costs eliminated through a unified CRM and operations platform.

CORE SKILLS

Languages

TypeScript, JavaScript, SQL

Frontend & Mobile

React, Next.js, React Native, Expo, Tailwind CSS, Shadcn/UI

Backend

Node.js, NestJS, Express.js, REST APIs, Socket.io

Databases

PostgreSQL, MongoDB, TypeORM, Prisma, Supabase

Cloud & Infrastructure

AWS S3, Firebase, Git, GitHub, CI/CD

Platforms & Systems

Stripe, Google Maps API, SendGrid, JWT, RBAC, server-side caching

EDUCATION

Universidad Tecnológica de Santiago (UTESA)

Computer Engineering Studies
Dominican Republic

ADDITIONAL TRAINING

NestJS + Microservices, DevTalles, 2025
NestJS + OpenAI, DevTalles, 2025
Python certificate program focused on LLM applications
AWS training in progress

LANGUAGES

English, Fluent
Spanish, Native

SELECTED ENGINEERING / PRODUCT PROJECTS

Offload | On-Demand Laundry Marketplace **Live Product** 2025 - Present

Multi-sided, on-demand marketplace connecting customers, laundromats, and delivery operations through scheduled pickup, processing, and delivery workflows.

- Built React Native and Expo mobile applications with a NestJS backend and PostgreSQL data layer for customer, laundromat, and delivery-side workflows.
- Implemented location-aware pickup and delivery, bag-based pricing, wash and dry preferences, and Stripe payments.
- Designed fulfillment states from pickup request through processing and delivery or customer pickup, with real-time status updates via Socket.io and Firebase push notifications.
- Built business-side order intake, pickup queues, status controls, and customer communication workflows for laundry operators.

Stack: React Native, Expo, Next.js, NestJS, TypeScript, PostgreSQL, Stripe, Google Maps API, AWS S3, Socket.io, Firebase

Beusun | Multi-Vendor Marketplace **Live Product** 2025 - Present

Multi-vendor marketplace for local businesses with digital storefronts, products, order management, services, and logistics support.

- Built vendor onboarding and verification with identity documents, face photos, and business addresses to reduce fraud and account impersonation.
- Implemented storefront, product, category, order-management, commission, and earnings workflows, plus web and mobile experiences with geolocation, reviews, and Stripe integrations.

Stack: Next.js, React Native, Expo, NestJS, TypeScript, MongoDB, Stripe, Google Maps API, AWS S3, Firebase

Cibaura | Car Rental Marketplace **Live Product** 2026 - Present

Car-rental marketplace for comparing vehicle options, pricing, providers, and availability.

- Designed availability-calendar workflows that account for external bookings and help prevent double-booking across rental providers.
- Architecting the marketplace for future expansion into tours, bus rentals, and independent vehicle-owner inventory.
