ANGEL ALMONTE

SENIOR FULL-STACK SOFTWARE ENGINEER

Lodi, NJ +1 (551) 362-7203 angelrepublic24@gmail.com linkedin.com/in/angel-almonte github.com/angelrepublic24
almonteportfolio.com

PROFESSIONAL SUMMARY

Full-stack engineer who builds and owns production systems end to end, from architecture to deployment. Joined Tudélü as the sole engineer and built the CRM, quoting, inventory and manufacturing platform the company runs on, replacing about $9,000/month in SaaS. Builds AI agents and LLM features into production systems and has shipped three marketplace products across web and mobile. Stack: TypeScript, React, Next.js, React Native, NestJS, PostgreSQL, AWS, Stripe.

PROFESSIONAL EXPERIENCE

Tudélü / Duralux Architectural Canopies
Aug 2024 - Present

Full-Stack Software Engineer / Technical Lead | Little Ferry, NJ

- Joined as the sole engineer and designed the architecture of a unified CRM and operations platform (Next.js, NestJS, PostgreSQL, AWS S3), owning frontend, APIs, data model and deployments.
- Consolidated CRM, sales, quoting, e-commerce, inventory, production and internal workflows previously spread across HubSpot, Trello and separate tools, cutting software costs by about $9,000 per month.
- Built the quote-to-order system used by sales reps, distributors and end customers: dimension-based pricing, 3D product rendering, digital signing, Stripe payments, real-time inventory and carrier shipping-rate quotes.
- Developed a Manufacturing Execution System connecting the platform to the shop floor: material scanning, cutting instructions, panel assembly and shipping handoff, with validations that block incorrect or excess material use.
- Implemented the sales pipeline, distributor portal and management, regional rep routing, automated emails, RBAC for four user roles and S3 document management.
- Built an AI bug-triage agent: when a bug report is filed, it analyzes the live codebase, identifies the likely root cause, explains the fix and generates a ready-to-run prompt for AI coding tools.
- Built a self-hosted voice assistant for the CRM (Whisper, Llama 3.1 on Ollama, Piper TTS) that answers CRM questions and sets follow-up reminders.
- Grew from sole engineer to technical lead: recruited and onboarded developers, reviewed implementations, made architecture decisions and coordinated delivery; primary owner of platform reliability.

Development Real Time Strategy (DRTS)
Nov 2021 - Present

Founder & Lead Full-Stack Engineer | Lodi, NJ

- Founded a product studio building SaaS, marketplace, mobile, e-commerce and operations platforms; led end-to-end engineering and shipped three live marketplace products.
- Improved application performance by 15% through server-side caching and NestJS architecture improvements.
- Recruited, onboarded and led a cross-functional team of six engineers and designers across client and internal products.

$9K/month
Software costs eliminated through a unified CRM and operations platform.

3 live products
Marketplaces shipped across web and mobile: on-demand delivery, multi-vendor and car rental.

CORE SKILLS

Languages
TypeScript, JavaScript, Python, SQL

Frontend & Mobile
React, Next.js, React Native, Expo, Tailwind CSS, Shadcn/UI, WordPress

Backend
Node.js, NestJS, Express.js, REST APIs, GraphQL, Socket.io

AI & LLMs
OpenAI API, LangChain, Ollama, Whisper, prompt engineering, LLM integrations

Databases
PostgreSQL, MongoDB, TypeORM, Prisma, Supabase

Cloud & Infrastructure
AWS S3, Firebase, Git, GitHub, CI/CD

Platforms & Systems
Stripe, Google Maps API, SendGrid, JWT, RBAC, server-side caching, HubSpot

EDUCATION

Universidad Tecnológica de Santiago (UTESA)
Computer Engineering Studies
Dominican Republic

ADDITIONAL TRAINING

NestJS + Microservices, DevTalles, 2025
NestJS + OpenAI, DevTalles, 2025
Python certificate program focused on LLM applications
Docker & containerized deployment, in progress
AWS training, in progress

LANGUAGES

English, Fluent
Spanish, Native

SELECTED ENGINEERING / PRODUCT PROJECTS

Offload | On-Demand Laundry Marketplace **Live Product** 2025 - Present

Multi-sided marketplace connecting customers, laundromats and delivery operations through scheduled pickup, processing and delivery.

- Built React Native and Expo mobile apps with a NestJS backend and PostgreSQL data layer for customer, laundromat and delivery-side workflows.
- Implemented location-aware pickup and delivery, bag-based pricing, wash and dry preferences, and Stripe payments.
- Designed fulfillment states from pickup request through processing and delivery, with real-time status updates via Socket.io and Firebase push notifications.
- Built operator-side order intake, pickup queues, status controls and customer communication workflows.

Stack: React Native, Expo, Next.js, NestJS, TypeScript, PostgreSQL, Stripe, Google Maps API, AWS S3, Socket.io, Firebase

Beusun | Multi-Vendor Marketplace **Live Product** 2025 - Present

Marketplace for local businesses with digital storefronts, products, order management, services and logistics support.

- Built vendor onboarding and verification with identity documents, face photos and business addresses to reduce fraud and impersonation.
- Implemented storefront, product, category, order-management, commission and earnings workflows, plus web and mobile experiences with geolocation, reviews and Stripe.

Stack: Next.js, React Native, Expo, NestJS, TypeScript, MongoDB, Stripe, Google Maps API, AWS S3, Firebase

Cibaura | Car Rental Marketplace **Live Product** 2026 - Present

Car-rental marketplace for comparing vehicle options, pricing, providers and availability.

- Designed availability-calendar workflows that account for external bookings and prevent double-booking across rental providers.
- Architecting the platform for expansion into tours, bus rentals and independent vehicle-owner inventory.
